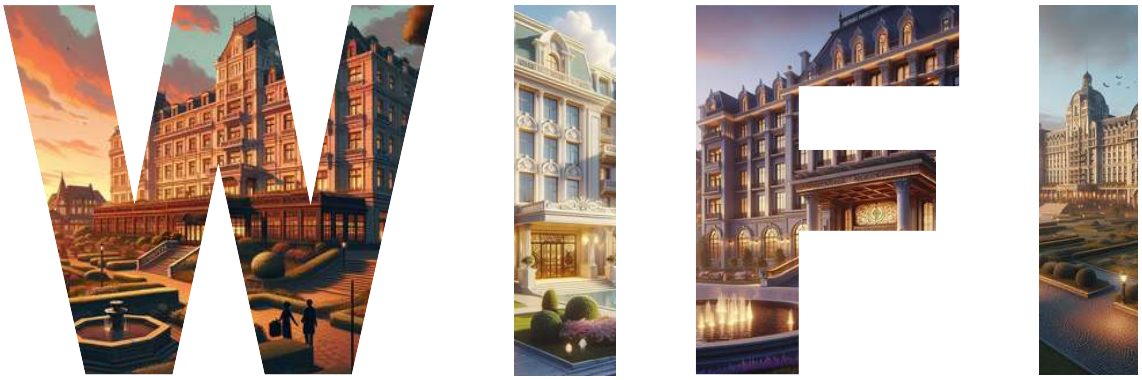
DanMagi's

Site Survey

DanMagi



➤ All your Wi-Fi Needs - in one place!

Part 1:

The Challenge

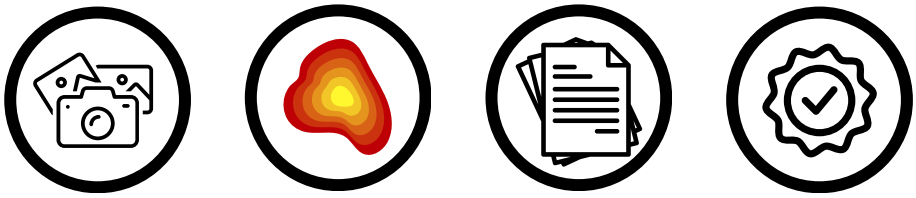
In today's hospitality environment, seamless connectivity isn't optional — it's expected.
However, many hotel networks face challenges such as:

* Dead zones and inconsistent Wi-Fi coverage
* Outdated or misconfigured network equipment
* Lack of visibility into network performance
* Unexpected downtime impacting guests and staff

Without clear insight into your network's health, guest satisfaction and operational efficiency suffer.

Our Solution

DanMagi's Site Survey Services provide a professional, data-driven analysis of your network infrastructure — remotely or on-site — to uncover issues, document your environment, and design an optimized network for both guest and admin operations.



Part 2:

Our Solution

Two options to fit your needs:

The work conducted will be on-site, however, DanMagi's engineers will need to collect critical information prior to the survey.

1. Remote Site Survey – $900

A fully remote analysis based on your property's floor plans, network documentation, and remote access.

*Includes a network review, design proposal, and Bill of Materials (BOM).

2. On-Site Site Survey – $900/day + travel

A comprehensive in-person assessment with Wi-Fi heatmaps, channel planning, and detailed documentation of all network equipment.

After the site survey, DanMagi can also:

- Develop a Bill of Materials (BOM) with recommended hardware
- Assist with equipment sourcing and installation
- Assist with Network Remediation to solve current network configuration issues
- Provide ongoing network monitoring and management

Part 3:

Your Benefits

Exceptional Guest Wi-Fi – Strong, consistent coverage across all areas.

- Optimized Network Performance – Identify and fix weak points before they cause problems.
- Future-Ready Infrastructure – Scalable design supporting your growth and new technologies.
- Streamlined Procurement – Clear, vendor-agnostic BOM and installation support.
- Expert Guidance – Access to experienced hospitality network engineers.

Deliverables

- Network Analysis Report
- Wi-Fi Design & Heatmap (on-site)
- Network Improvement Proposal
- Bill of Materials & Implementation Plan (optional)

Why DanMagi

With years of experience managing hotel networks worldwide, DanMagi delivers reliable HSIA, monitoring, and Wi-Fi management services designed for the hospitality industry.
Our goal is simple: ensure your property's connectivity is as exceptional as your guest experience.
